

To help you assess your progress in Maths and identify your next steps for improvement the routine for completing your homework will be as follows:

- as you complete your homework grade each question with a tick, circle or cross, for example:

✓ = completed comfortably / I understand this
○ = needed help to complete / not sure
× = struggled to complete / did not understand

- submit your homework by the agreed deadline
- your marked homework will be returned to you and you must complete your corrections if necessary and resubmit for marking
- solutions will be displayed on your classroom notice board, some points may be discussed in class, you may also need to see your teacher to go over some parts
- complete the topic checklist and keep it in your homework jotter for your teacher to view on submission of next homework exercise
- after you have received your final marked homework exercise you must add a short statement: 'My next steps are...', this may include:
 - further practice
 - see teacher for more help
 - complete more challenging problems, etc
